

**Voskhod. 175cc's. 195£s.**

The Voskhod 175cc is the kind of motor-bike that makes the 125 you had your eye on look very small indeed.

Especially when you consider that the price is around the same, yet the capacity is much greater.

And you'll have to agree that it is a very good looking machine too.

It comes in a choice of colours.

And the extras we give with the bike are extras you'd have to pay for on many other makes.

They include: Windscreen, Legshields, Rear Carrier, Tool Kit and Spares, Indicators, Mirror, Pillion Rests, etc. Over £30.00 worth on most motorcycles.

The Voskhod 2. At £195 including VAT it's a very inexpensive way to have a lot of fun, and a very practical way to get to and from work.
